

# PLANTS of the JAPANESE GARDEN

# Acknowledgments

This 2011 Update to the Japanese Garden Plant List Booklet is the result of the efforts and contributions of the following:

Kathleen Smith, long-time volunteer with Unit 86 of the Arboretum Foundation worked with Seattle Parks and Recreation to research the plant collection for the original list and created the Plant List Booklet in 1995 and updated it from 1995 to 2008.

The Plant Committee of Unit 86 of the Arboretum Foundation (Hiroko Aikawa, Maggie Carr, Sue Clark, Gale Hall, Beverly Hughes, Kathy Lantz, chair, and Aleksandra Monk) revised and updated the 2011 Plant List.

Kathleen Blanchard served as Seattle Parks and Recreation Head Gardener for the Japanese Garden from 2004 to 2010. The plant committee thanks her for her enthusiasm and dedication to the garden and wishes her well in her new assignment. We would like to welcome Sue DeNure as the new Seattle Parks and Recreation Head Gardener for the Japanese Garden.

# THE JAPANESE GARDEN

Seattle, Washington

Welcome to the Japanese Garden in the Washington Park Arboretum. Thank you for supporting the Garden through your visit and purchase of this booklet.

The 2011 Plant List Booklet was created to increase your enjoyment and knowledge of the Garden. It lists the plants in the Japanese Garden as of January, 2011. The plant collection changes during the year and this booklet will be updated annually to reflect these changes.

## How to use this Plant List

You will find the garden divided into 28 areas which are assigned with letters of the alphabet. The areas are shown on the map on the back cover. The booklet contains two lists. The first list, Japanese Garden Plant List 2011, lists the plants in an area within the garden and can be used as you walk through the garden areas to help identify a plant within a specific area. The second list, the Alphabetical List, can be used when you want to find the area that a specific plant is located within the garden.

Seattle Parks and Recreation manages the Garden and the plant collection in partnership with the Japanese Garden Advisory Council and support of Unit 86 Docents of the Arboretum Foundation.
